DETAILED ACTION

This action is responsive to the application filed January 31, 2001. Claims 1-226 are pending. Claims 1-226 represent methods and apparatus for analyzing, processing, and formatting network information such as web-pages.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-64, drawn to format conversion of information for display on a wireless device, classified in class 455, subclass 414.4.
 - II. Claims 65-76, 118-129, and 171-182, drawn to generating a directory from parsed information, classified in class 707, subclass 102.
 - III. Claims 77-98, 130-151, and 183-204, drawn to manipulating parsed information for use in a directory, classified in class 707, subclass 101.
 - IV. Claims 99-107, 152-160, and 205-213, drawn to an external server providing personal profile information regarding the user that is surfing the Internet with a client application that is communicating with the external server, classified in class 709, subclass 224.
 - V. Claims 108-117, 161-170, and 214-223, drawn to changed presentation format of a parsed document, classified in class 715, subclass 523.
 - VI. Claims 224-226, drawn to the reformatting a website to fit a display, classified in class 709, subclass 246.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II-VI have separate utility such as generating a directory from parsed information, manipulating parsed information for use in a directory, providing personal profile information regarding a user surfing the Internet, changing presentation format of a parsed document, and reformatting a website to fit a display. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Julian H. Cohen on May 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A shortened statutory period for response to this action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
